

PRODUCT FEATURES:

- Surface mounted
- Strong and Unbreakable
- 250 times tougher than glass
- Frameless mirror
- 6mm Polycarbonate
- Lightweight Polycarbonate mirror
- Smooth corners and edges
- Custom sizing available

Overall Dimensions Available:

746-1820: 450mm x 500mm

746-1840: 450mm x 1000mm

OR

Specify "W" width and "H" height

Other options available:

- 6mm for sizes over 600x1000 this is double backed
- Model: 745-HC 6mm Polycarbonate mirror with hard coat abrasive resistance surface.

PRODUCT DATA:

CONSTRUCTION:

MIRROR: Fabricated of 6mm Polycarbonate with smooth corners and edges. The material is essentially a high quality extruded Polycarbonate sheet with a metallized back which gives it its reflective qualities.

The metallized back is protected with a coat of paint.

NOTE: Polycarbonate mirrors will differ in optic quality from that of glass mirrors. Polycarbonate Mirrors are the toughest mirrors, 250 times tougher than glass.

Polycarbonate mirror is commonly used in hospitals, public areas and prison projects as it is not a breakable material once bonded to a solid surface.

INSTALLATION:

Silicone fix to wall OR fixing holes can be provided on request.

NOTE:

Custom sizes over 600mm x 1000mm will require a 6mm backing to prevent warping.

NOTE:

Do not use abrasive cleaners or cleaning cloths as doing so can leave scratch marks. Clean with a soft damp cloth or an alcohol wipe.
