

PRODUCT FEATURES:

- Surface mounted
- 32mm diameter
- Concealed fixing
- U shaped shower grab rail
- Overall dimensions: 750mm W x 750mm H

PRODUCT DATA:

CONSTRUCTION:

FLANGES: Fabricated of type 304 (18-8), 80mm dia. 13 gauge stainless steel.

ESCUTCHEONS: Fabricated of type 304 (18-8), 22 gauge stainless steel.

One-piece drawn construction with exposed surfaces in architectural satin finish. Snap over flanges to conceal mounting screws.

TUBING: Fabricated of type 304 (18-8), 32mm (1-1/4") O.D.

18 gauge stainless steel, seamless construction with exposed surfaces in architectural satin finish. Bent ends of tubing pass through the flanges and are heliarc welded into a single structural unit for maximum strength. Intermediate supports are contour cut and joined by heliarc welding to form an integral part of the grab rail. All welds ground and polished to blend. Mandrel bending process maintains uniform rail diameter.

STRENGTH:

When properly mounted, it is a heavy duty grab rail system.

INSTALLATION:

Secure to wall where adequate in-wall backing exists. Use rail as template to locate mounting holes. Drill holes and set anchors as appropriate. Mount grab rail and secure mounting screws. Snap escutcheons into place.

GUIDE SPECIFICATION:

U shaped shower grab rail shall be fabricated of type 304 satin finish stainless steel with concealed mounting flanges with overall dimensions of 750mm W x 750mm H.

Polished (No. 4) satin finish
will not scratch hands
or catch dirt

Mandrel bending
process maintains
uniform
rail diameter

Bar heliarc welded
to flange to form
a single structural
unit for maximum
strength

18 gauge type 304
stainless steel

Escutcheon /cover

Escutcheon/ cover snaps over
flange to conceal mounting
screws

Flange of 13 gauge type 304
stainless steel

Mounting holes

*50-60mm wall clearance required
under most building design codes
